In re Application of:
John SANTHOFF, et al.
Application No.: 10/663,174
Filed: September 15, 2003
For: ULTRA-WIDEBAND
COMMUNICATION PROTOCOL

DECISION ON PETITION
TO MAKE SPECIAL

This is a decision on the petition, filed July 6, 2004 under 37 C.F.R. §102(d) and M.P.E.P. §708.02(XI): Inventions For Countering Terrorism, to make the above-identified application special.

M.P.E.P. §708.02 (XI), which sets out the prerequisites for a grantable petition for Inventions For Countering Terrorism under 37 C.F.R. § 102(d), states in relevant part:

International terrorism as defined in 18 U.S.C. 2331 includes "activities that - (A) involve violent acts or acts dangerous to human life that are a violation of the criminal laws of the United States or of any State, or that would be a criminal violation if committed within the jurisdiction of the United States or of any State; [and] (B) appear to be intended - (i) to intimidate or coerce a civilian population; (ii) to influence the policy of a government by intimidation or coercion; or (iii) to affect the conduct of a government by assassination or kidnapping..." The types of technology for countering terrorism could include, but are not limited to, systems for detecting/identifying explosives, aircraft sensors/security systems, and vehicular barricades/disabling systems.

Applicants who desire that an application relating to inventions for countering terrorism be made special should file a petition with the petition fee under 37 CFR 1.17(h) requesting the Patent and Trademark Office to make the application special. The petition for special status should be accompanied by a statement explaining how the invention contributes to countering terrorism.

Petitioner's submission fails to meet the criteria set out with respect to countering terrorism in M.P.E.P. §708.02(XI). The specification and claims as originally filed provide no indication of an intention to counter terrorism by providing an ultra-wideband communication network. The claimed invention fails to indicate countering terrorism. Further steps would be required to actually offset or nullify terrorism, yet no suggestion of "countering terrorism" is found in the disclosure. As a result, no advancement in the technology of countering terrorism has been persuasively shown.

Accordingly the Petition is **DENIED**.

Any request for reconsideration must be filed within two months of the mailing date of this decision.

It is suggested that applicant review M.P.E.P. §708.02 regarding other grounds available for filing a petition to make special. In particular, note M.P.E.P. §708.02(VIII): Accelerated Examination, which does not place limitations on the subject matter of the application.
